EDUCATION

Bachelor of Computer Science and Engineering, SRM University, **GPA: 9.89 /10** **July 2022 - May 2026**

Coursework: Data Structures and Algorithms, Operating Systems, Object Oriented Programming, Programming for Problem Solving, Database Management Systems, Machine Learning.

SKILLS

Languages : C/C++, Python, Java, HTML/CSS, JavaScript, SQL
Databases & Tools : MySQL, SQL Server, Git, GitHub, Machine Learning
Core Competencies : Leadership, Problem Solving, Team leader, Community Management

EXPERIENCE

ZS Associates

Dec 2025 - Present

Decision Analytics Associate (*Full-Time*)

Pune, India

- Developed and maintained data-driven reporting solutions using **SQL, Power BI, Microsoft Excel, and Amazon Redshift**, building dashboards and maintaining backend reporting databases for multiple production analytics applications supporting the **Jazz Pharmaceuticals US Oncology team**.
- Designed and implemented analytical solutions, including the **Rylaze Reimbursement Analysis Dashboard** and a **Potential Revenue Forecasting Tool**, utilizing data processing, scenario analysis, and $\pm 1\%$ sensitivity-based calculations to support business decision-making.
- Diagnosed and resolved production backend issues by optimizing **SQL queries**, refreshing datasets, resolving **Amazon Redshift schema and ODBC configuration issues**, and deploying fixes across **Development, Test, and Production** environments.
- Collaborated with cross-functional **stakeholders** to translate **business requirements** into **scalable technical solutions**, delivering dashboards, backend enhancements, and technical documentation while working with large enterprise healthcare datasets.

Amazon

August 2025

ML Summer School

- Selected from 60,000+ applicants and completed an intensive program covering **key ML topics** including **Supervised Learning, Deep Neural Networks, Generative AI and LLMs, Reinforcement Learning**, and received a **Certificate of Acknowledgement**.

J.P. Morgan Chase

June 2025

Code for Good Hackathon

Hyderabad, India

- Led frontend development for a **MERN stack web app** for Centre for Microfinance and Livelihood (CML), an associate of Tata Trusts, improving digital accessibility for **1000+ rural farmers** and CRPs by building responsive dashboards, forms, and real-time query systems using **React.js**.
- Researched about **Nokia's Live Tool** and integrated **Fast2SMS** to enable SMS-based communication without internet, delivering vital alerts to farmers in local languages.

MIT Square

Oct 2023 - Jan 2024

Research Intern

Chennai, India

- Developed a Disease Prediction System using Machine Learning in collaboration with the **University of Ilorin, Nigeria**. Created a user-friendly web app with Streamlit, enabling predictions for diseases such as **Diabetes, Heart Disease, and Parkinson's** based on health parameters and clinical data. Additionally, we filed a patent with the **Government of India** for this healthcare solution.

PROJECTS

MediPredict: A Machine Learning-Based Health Risk Predictor ([Try it here](#))

- Developed MediPredict, a Machine learning Web App to predict **Diabetes, Heart disease, and Parkinson's disease** risk. Built an intuitive interface using Python and **Streamlit** for users to input clinical data easily. Implemented **SVM** and **Logistic Regression** models for accurate disease prediction.

- Designed separate modules for each disease with dynamic input validation and instant result display. Focused on usability and accessibility to support early diagnosis through a **user-friendly experience**.

CalConnect ([Try it here](#))

- Developed a full-stack Google Calendar App using **React.js, Node.js, and Express.js**, integrating **Google OAuth 2.0** for secure authentication and the **Google Calendar API** to fetch and display user events.
- Implemented login via **Google, events retrieval, and date-based filtering of events**, improving user experience by allowing access to user's events.

Snake Game ([Try it here](#))

- Designed and programmed fully functional Snake Game in **JavaScript**. Implemented intuitive controls for engaging user experience, allowing easy navigation of the snake using arrow keys.

Password Generator ([Try it here](#))

- Created efficient password generation algorithm using **HTML, CSS, JavaScript**. Generates strong, secure passwords with **customizable options** (length, characters).

HONORS & AWARDS

- Attained **First Rank** and received a **Certificate of Excellence** and an Award for achieving a **CGPA of 10.0** during the first year of B.Tech, demonstrating exceptional academic performance, and inclusion in the **Dean's Merit List**.
- Earned accolades in high school competitive exams, including a **Gold Medal** in SIPHO and UCO, a **Silver Medal** in NSO and SICHO, and a **Bronze Medal** in IMO and UIEO, showcasing excellence in problem-solving and subject knowledge.
- Winner of the **ZS DAA Bootcamp Case Study** for solving a real-world healthcare analytics case by designing a data-driven HCP targeting and customer segmentation strategy, identifying high-impact prescribers covering **~40%** of the market and proposed targeted engagement strategies to improve product adoption.
